

WAVERLY INDUSTRIES

Waverly Industries produces and distributes inexpensive, highly effective, eco-friendly products for commercial, industrial and institutions. Our products are friendly to the environment, to animals and humans, and to your budget. Visit www.WaverlyIndustries.com for more information. Call **1-800-925-7052** for bid estimates.

Winter Products

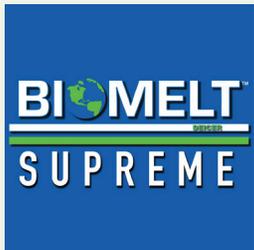

Liquid Products

Liquid Snow and Ice Maintenance

GEOMELT® 55 Liquid Organic Accelerator, a natural beet juice blend, is a highly effective salt or salt/sand stockpile treatment to prevent bulk material freeze.

GEOMELT® S7 and S8 Anti-icing/Deicing Liquid Beet/Brine Blends are natural agricultural products derived from renewable resources and blended with sodium chloride brine that feature snow and ice control performance superior to traditional brines, but less corrosive. GEOMELT will reduce salt application rates by up to 30% and substantially reduce operating costs while providing a sustainable and environmentally sensitive alternative.

BIOMELT® Supreme Anti-icing/Deicing fluid is a natural **corn** product derived from renewable resources and blended with proprietary Polyol to control snow and ice which is less corrosive than traditional brines. BIOMELT Supreme will reduce application rates by 30–50% compared to typical acetate and chloride deicers.

Aerospace-Approved Runway Deicer/Anti-icer

Gen3 Runway Deicer/Anti-icer resolves the corrosion issues caused by the use of traditional alkali salt deicers without the loss of performance. AMS 1435 approved.

Granular Products

Granular Ice Melt and Deicers

Distributed by Waverly Industries, **BIOMELT® Granular Ice Melt** is an engineered ice melt product formulated with

a biotechnology-produced ingredient made from **corn** plus a specified blend of sodium chloride salt screened to a specific particle size to enhance flowability through spreaders. This unique blend is environmentally friendly and extremely effective at low temperatures -20°F. BIOMELT will melt more snow and ice than rock salt and is less corrosive than rock salt. Easy to see blue/green crystals eliminate excess application, and it does not stain floors or carpets

ECOSALT™ Medium Granular is treated with **GEOMELT® 55 Liquid Organic Accelerator**, a natural beet product, that features snow and ice control performance superior to traditional rock salt, but is less corrosive to equipment and environment. ECOSALT's effective working temperature -20°F will reduce salt consumption by 30% increasing equipment and employee efficiency.
